August 2, 2013

Dear SEPA Reviewer:

Snohomish County Public Works proposes to construct a two way left (center) turn lane, bike lanes, and sidewalks. The existing travel lanes are approximately 12 feet wide and the proposed two way left (center) turn lane would be 12 feet wide. These roadway improvements would extend for 1.8 miles north from 180th Street SE to 152nd Street SE (Seattle Hill Road). The project proposes to install a new traffic signal at the intersection of 35th Avenue SE and 156th Street SE. The project would acquire additional roadway right-of-way to accommodate the proposed improvements. An improved drainage system including stormwater flow control and water quality treatment facilities would also be constructed.

This letter is to let you know about this project and that an environmental review of the project has been completed. A State Environmental Policy Act (SEPA) Environmental Checklist and Determination of Non-Significance (DNS) have been issued. The DNS states that no significant environmental impacts are anticipated from construction of this project. A Land Disturbing Activity Permit is also required.

Comments on this project must be submitted by August 26, 2013. For more information or to submit comments contact:
